

## Supporting CommUnity

### **Staff Communication; Control, Filters and Perception**

The way you communicate greatly influences the outcome of a conversation. What you say and when and how you say it determines the conversation's success or failure. Our communication is continually influenced by individual filters. Those filters are established by many different factors, one of the most prevalent these days is the generational filter, developed in the process of socialization and experiences. These filters crucially affect communication and interaction. We will discuss multiple communication models, helping you determine what will be the most successful approach for you and your staff.
